REPORT

OF THE

BOARD OF ADMINISTRATORS OF THE CHARITY HOSPITAL

For the Year Ending December 31st, 1886.

NEW ORLEANS, February 7th, 1887.

To His Excellency S. D. McEnery, Governor of Louisiana, Ex-Officio President of the Board of Administrators of the Charity Hospital of New Orleans:

Your Excellency-At the beginning of the New Year, it is my agreeable duty to report the completion and occupation of the Ambulance House, the last of the more important improvements undertaken by the present Board of Administrators of the Charity Hospital. The Ambulance Service itself has been very diligently cared for; a third and new ambulance has been built in this city recently, the vehicle being fully equal, if not superior, to those constructed at the North, while the cost has been materially less, facts which speak favorably for home enterprise and New Orleans mechanics; the Ambulance Corps has been brought to a high degree of perfection, and the zeal and alacrity displayed by the students and drivers are deserving of unstinted commendation. The upper story of the Ambulance House has been divided off into quarters for both the students and drivers, a fact worthy of some notice, because until then, the bed-rooms of the first-year students were located in the main Hospital building. These rooms were cramped and confined, the ventilation being particularly defective. This matter has been a subject of solicitude to the Board, who feared the deleterious effects of such unsanitary conditions upon the health of the inmates of these rooms, but were powerless, until quite lately to apply the proper remedy.

The creation of a clinic for skin diseases, under the charge of Dr. Blane, and the purchase of a complete electric battery, are also worthy of special note.

There were 5807 new patients admitted to the Hospital during the year 1886; if to the above be added 556 sick, who were carried over from 1885, the total number of patients in the house during the past year, amounted to 6363. There were 960 deaths, making a death rate of 15 per cent. This will be seen, however, to be unfair to the Hospital, for, of the patients admitted during the year, 71 died on the very day of their admission, and 96 on the day following, showing the very unfavorable condition of such sick on their entrance. If due allowance be made for these facts, the death rate would be reduced to about 12 per cent. On comparing the years 1885 and 1886, it will be seen that the Hospital sheltered beneath its roof, during the past twelve months, 336 patients less than in 1885.

Owing to the large number of colored people who enter the Institution, there is overcrowding in the wards allotted them, a matter to which your Excellency's attention is respectfully directed.

The out-door clinic has been numerously attended, there having been 13,336 applications for relief in both medical and surgical cases, all of which received the necessary treatment and care. It is a matter of regret to be obliged to chronicle instances of not regularly attending their wards, on the part of some members of the visiting staff of physicians and surgeons. It must be said in justice, however, that the large majority of the visiting staff appear to be fully conscious of the honor conferred by the title of Visiting Physician, or Surgeon, and it is believed hat the Board will find no difficulty in securing greater reguarity.

. In view of the various names given certain diseases by nedical men, it is with difficulty, sometimes, that the statis-

tical records of the Hospital can be properly kept. To obviate this trouble, so apparent to the profession, the Honse Surgeon agrees with my honored colleague, Dr. Bickham, and myself, in recommending that the Board decide upon selecting the system of nomenclature adopted by the Royal College of Physicians.

An improvement which has long been greatly needed, and which should be made at the earliest possible moment, is a complete change in the system of water-closets, which, as they at present exist (and their condition dates back for years), are by no means in keeping with the requirements of the sick, and are neither comfortable, nor in keeping with the other arrangements of the Hospital. Want of funds alone has prevented, up to the present, the Board from taking such steps to remedy this evil as are indispensable.

The services rendered by the Hospital professional Library are becoming more and more apparent. It is with regret, however, that I find myself compelled to say that the growth of the Library is slow; and it is sincerely to be hoped that the friends of the Institution may be induced by this plain statement to contribute to its increase.

There have been many improvements carried to completion in and about the Hospital, which will be found mentioned in the reports of the several Committees.

The finances of the Hospital have been a source of constant solicitude during the year. Your Excellency is familiar with the status of the warrants appropriated for the Hospital by the Legislature; it will suffice, therefore, to state that the loss on warrants, in 1886, has approximated the sum of \$16,000, and that, owing to the discount on this class of paper, the Hospital's closes the year in debt. The facts and figures explanatory of this circumstance will be presented elsewhere. There remains if still due on the Ambulance Building a balance of \$6023 26. y The warrants of 1886, amounting to \$43,750, and the sums

borrowed thereon, during 1886, being \$27,625, it follows that the Hospital has made a clear loss of \$16,125, which explains the unpaid balances in the report of the Secretary and Treasurer. Too much praise cannot be meeted out to the House and Finance Committees for their unflagging zeal during the year so recently ended. The members of the former Committee have been tireless in their endeavors to promote the objects in view; while those of the latter have never lost heart, although often surrounded by difficulties of a financial character, whose solution was almost impracticable. Notwithstanding the adverse circumstances mentioned above, it is a remarkable fact, that, after dividing the entire collected revenue of the Hospital during 1886, by the number of inmates, and including expenses of all kinds, living, maintenance, improvements, repairs, etc., each individual living within the Hospital limits, has cost the Institution only forty cents per diem. A regrettable litigation has arisen between the New Orleans Gas Light Company and the Hospital. After supplying the Hospital with gas gratuitously from the period of its establishment, the Gas Company has, during the past year, endeavored to charge for the gas furnished. Your Excellency being familiar with the facts in this controversy, it will be unnecessary to enter into their discussion here. The matter is at present before the courts, where it was brought by the Board of Administrators of the Hospital, who are unable to meet the demands of the Gas Company, and who, owing to an immunity for fifty years from paying for gas, are unwilling to assume the responsibility of charging their successors in office with such obligation, at least until the public tribunals may have decided adversely to the Hospital.

In concluding this report, the warmest thanks of the Board are due the zealous Sisters of Charity, whose ministrations have assisted in smoothing over difficulties and have immeasurably contributed towards whatever success the Hospital may be cred-

performed their duties in a manner most satisfactory to the Board; and the same remark is applicable to the distinguished Pathologist of the Hospital, the Chemist, whose labors have been arduous and invaluable, the Visiting Staff of Physicians and Surgeons and to the Corps of Students, whose work has been, generally, well done. Owing to the financial difficulties touched upon above, the thanks of the Board are specially due the Secretary and Treasurer, whose task, last year, was one of unusual difficulty.

The practical judgment of the Engineer has also been of much value to the Institution, and the work of the Clerk has been systematically and well done.

To my colleagues, composing the Board of Administrators, is due the simple mention of a fact, which speaks for itself, namely, that during the five years the present Board have had charge of the Hospital, there has not agen a single meeting postponed for want of a quorum.

I remain your Excellency's humble and obedient servant,

THOMAS LAYTON, M. D.,

Vice-President.

REPORT OF THE SECRETARY AND TREASURER.

CHARITY HOSPITAL. STATE OF LOUISIANA, New Orleans, February 7th, 1887.

To the Vice-President and Board of Administrators:

Gentlemen—In presenting the usual statements for the fiscal year ending December 31st, 1886, I would call your attention to the following matters:

STATE WARRANTS, 1886.

This class of appropriations for the maintenance of the Hospital have been uncertain in their value, and has much hampered any positive calculation as to revenue.

In round figures, the Hospital has received from the State in such assets \$43,750 for the entire year. The full sum of these warrants have been hypothecated to the Louisiana National and the Hibernia National Banks for equal amounts of \$21,875 each, and on which has been borrowed a total outstanding sum of \$27,625, or about sixty-three cents on the dollar.

These loans to the Hospital are liable to be called for at any time, and in that event the warrants would have to be sold at the best market price. At present, their value is nominal in character, with hopes of an improvement at an early date. The discount account of the Hospital is debited with \$1100 as interest to banks on the loans.

INSURANCE.

A reference to the "Tables of Insurance" will detail renewal of policies for three years on "Main Buildings and contents" and "Library" at net premiums of one and a half per cent. for three years on \$117,500, say \$1762 50, and on sheds of Union Press \$7500, at two per cent. for three years, say \$150. The insurance on Ambulance Building (\$8000) expires June 17th, 1887; on New Extension, Dead House and Eye Operating Room (\$30,000) on April 24th, 1887, and on sheds in Ambulance yard (\$1200) on July 16th, 1887.

LEASE OF SHEDS UNION COTTON PRESS.

The previous lease of this property to Colonel Samuel Boyd, at a rental of \$2600 per annum, expired September 1st, 1886.

A special committee of the Board, consisting of Messrs. Sinnott, Fairchild and Gibbons, succeeded in renting the Hospital's interest therein to Mr. A. P. Mason for a period of five years, expiring September 1st, 1891, at \$3270 31 per annum, being an increase of \$670 per annum.

The ownership in the sheds of the Union Cotton Press is divided as follows:

Charity Hospital	13	lots.
Female Orphan Society	10	66
St. Mary Catholic Orphan Boys' Asylum	6	44
Henderson Poor Fund	3	
In all	_	

These various owners have ratified the lease and receive their respective pro rata of the entire rental of \$8050 per annum.

LEGACIES.

The legacy of Mrs. Charlotte Piffet (\$3000) to the Hospital, heretofore reported, remains unpaid. There has been protracted litigation in regard to the estate, the matter being now about to be submitted to the Supreme Court for final decision. The same remark will in part apply to the unpaid half (\$250) of the legacy from Mrs. Caroline E. Simms, the matter being still before the lower court. The legacy from the estate of Mr. Jules Cassard (\$3000) was promptly paid and credited to the "Ambulance Building Fund."

AMBULANCE BUILDING FUND.

This account since its inception has been separated from the general accounts of the Hospital, and has been made up of sums from legacies, donations, and amounts received from the City of New Orleans on its appropriation of \$5000 for the year 1886. Three months of the latter, October, November and December, \$1250, are unpaid at this date, and the further appropriations discontinued.

The outstanding obligations accruing from this account may be summed up as follows:

Muir & Fromherz, builders, balance due	4,027	58
I. D. Fletcher, pavements, etc., as per bill	1,803	00
Manion & Co., balance due on plumbing, etc	192	68

Total due on Ambulance Building...... \$ 6,023 26

These bills are subject to approval and abatement. During the current year, when final payments are made on this account, it will be closed and published in pamphlet form.

GENERAL IMPROVEMENTS OF THE HOSPITAL.

There has been expended during the year the sum of \$8517 92 on general repairs and improvements. It was found necessary during the year to contract for a new boiler and alter the flues in the one purchased last year. The amount of this work owing Mr. John Ward is unpaid, being not yet due. His bills amount to \$1228 98.

TABLES OF RECEIPTS AND DISBURSEMENTS.

These tables, upon comparison, present an evenness with the previous year. The year (1886) closed with the December bills unpaid, which, with balance due on salaries for officers (\$400), and employees, etc. (\$1400), have been liquidated in January of the present year.

The difference between the face value of the warrants of

1886 (\$43,750), and the amount borrowed thereon (\$27,625), being their probable present value shows a clear loss of \$16,125, and is the reason for the unpaid balances noted above.

AUCTIONEERS' RETURNS.

This account shows receipts of \$11,588 36 for 1886, against receipts of \$13,885 14 for 1885, showing a falling off in income from this source of \$2276 78.

In conclusion, I present herewith the "Annual Statement of Receipts and Disbursements for 1886," the "Balance Sheet of the Books to December 31st, 1886," the "Table of Property, etc.," and "Statement of Insurance."

Respectfully submitted,

EDWIN MARKS,

Secretary and Treasurer.

REPORT OF THE FINANCE COMMITTEE.

CHARITY HOSPITAL, STATE OF LOUISIANA, New Orleans, February 7th, 1887.

To the Vice-President and Board of Administrators:

Gentlemen—Your Finance Committee would call your attention to the full and comprehensive report of the Secretary and Treasurer covering the fiscal affairs of the Hospital; they have but little to add thereto, beyond a reference to the situation growing out of the uncertain value of the Hospital warrants, etc.

The figures of the Secretary and Treasurer indicate a loss of some sixteen thousand dollars to the revenue of the Hospital, arising from the constant discount on the warrants issued by the State to the Institution, and even at that ruinous percentage it has been difficult to effect a sale. In fact, the recent law of the Legislature virtually inhibited a sale until hypothecation had been exhausted, and the consent of the Governor obtained for their selling. Upon a proper showing on the part of the Board that such sale was necessary, the Governor consented thereto, but the extreme dullness of the market has precluded its accomplishment up to the present.

The direct consequence of this condition of things is exhibited in the fact that the utilization of the amount of discount suffered would have enabled us to close the year with all indebtedness paid.

It is to be hoped that the present year will, in this regard, result more fortuitously to the finances of the Hospital.

Your Committee have made an accurate calculation of the

cost per capita of maintaining the Hospital, and find that for the past year it is forty cents. This calculation is based upon the entire collected revenue of the Hospital, and has been divided by the number of all its inmates, patients, efficers and employees.

This is certainly a moderate cost individually, when you take into account the facts that provisions for the patients are not stinted, either as to their sustenance or medical care, besides which all improvements and repairs to the Hospital buildings are attended to.

Respectfully submitted,

J. T. GIBBONS, H. W. FAIRCHILD, THOS. L. AIREY.

REPORT OF THE HOUSE COMMITTEE.

CHARITY HOSPITAL, STATE OF LOUISIANA, New Orleans, February 7th, 1887.

To the Vice President and Board of Administrators:

Gentlemen—Your House Committee would respectfully report the following improvements for the year 1886.

PORTICO IN FRONT OF MAIN BUILDING, ETC.

The old pavement forming the portico of the Main Building, which had become worn and disjointed from age and long use, has been taken up and been replaced by the Schillinger patent pavement, laid evenly and substantially, with a neatly framed inscription at the front of the hallway door, reading, "Charity Hospital, erected 1832." The best of the old pavement has been used to replace the wooden flooring transversely in front of the Amphitheatre, thus insuring a lasting surface.

HOSPITAL HEATERS.

Under the personal work and direction of Mr. John Ponder, the Engineer of the Hospital, steam heaters have been placed in every ward of the Hospital, so supplied with check valves as to admit of any temperature suitable for the inmates—the heat being generally regulated at about 70° in the cold days of winter.

NEW BOILER, ETC.

In accordance with the requirements growing out of the additional area for heating, a new boiler has been obtained and the tubes of the two old boilers taken out and changed to flues, insuring economy in fuel with enlarged power of steam heating. The roof of the Engine House proper has been raised some six

feet and a series of swinging windows introduced, giving full light and thorough ventilation to the machinery department.

ELECTRICAL APPARATUS.

A complete Electric Battery and appurtenances was purchased from the estate of the late Dr. I. L. Crawcour at an exceedingly cheap figure, and have been placed in an improvised room near the elevator on the second floor.

VULCAN PAINT ON OUT-BUILDINGS.

The dangerous proximity of the Roberts Sash Factory, on Howard street, with the constant menace of fire, has given the Board much thought during the past year. After the failure of efforts to induce the City of New Orleans to purchase and remove the property, it was finally determined to lessen the danger from fire from the factory by painting the out-buildings of the Hospital fronting it with the Vulcan Fire Proof Paint, which has stood the severest public tests, and which meets with general favor as a fire protector.

GENERAL HOSPITAL REPAIRS, ETC.

The Hospital buildings have in part been touched up with paint and kalsomine during the year. The Kitchen auxiliaries have been added to by two Steam Roasters and a Milk Refrigerator. Additional ventilation has also been afforded it.

THE AMBULANCE SERVICE.

The Ambulance Service of the Hospital is in complete working order. The house erected therefor is fully adapted for the requirements of the service, and every call is answered with prompt alacrity.

The second-story rooms have been neatly furnished for eight of the Resident Students and the two drivers of the ambulances, and at night, at the tap of the electrical gong, drivers and students pass down the "slip poles" and in a few seconds are in their respective positions on the vehicle and ushered into the street.

A new ambulance has been built by the firm of D. Driscoll & Bro., of this city, and has lately been delivered.

It is a creditable piece of work, fully equal in every respect to the two built at the North, and was furnished at a less price.

This gives the Service the benefit of three ambulances, and will enable the Board to keep two in constant service and all in full repair.

The public appear to be grateful for the additions of the Ambulance Service to the Hospital, and owe it to themselves to see that their contributions for its maintenance are at all times forthcoming.

Respectfully submitted,

SAM'L BOYD, Chairman, JOSEPH M. RICE.

LIST OF DONATIONS

RECEIVED DURING THE YEAR 1886.

Jos. M. Rice, 2 large geese.

B. Bergamini, 2 large turkeys.

A Lehmann, 2 bolts calico for children's dresses.

Wm. Duryea, New York, 1 bbl. corn starch.

Wm. Hang Lang, 3 caddies of tea.

Mrs. Dr. S. H. Chute, \$5.

Mr. Carroll, reading matter for patients.

Mrs. E. B. Denegre, oranges, birds and books.

Mr. Brown, Boston, \$5.

Mrs. Wintz, children's clothes.

A. Peperkorn, "patient," 5 galls, honey.

Mrs. E. B. Denegre, books, socks and 8 yds. canton flannel.

Mrs. Jos. M. Rice, children's clothes.

John Weldi, Highland, Ill., 1 case Helvetia condensed milk.

Miss C. M. Hagan, picture books for children.

Mrs. Jos. M. Rice, men's clothes and shoes.

W. H. Letchford, reading matter.

Miss Rawlins, fruit, flowers, clothes and reading matter.

Miss E. Boothe, clothes for old people.

Miss Mortimer, made 34 little dresses for children.

Miss C. Stauffer, library for Boys' Ward, 100 vols. (choice).

Mme, de Duke, children's clothes and shoes.

Mrs. Schneider, children's clothes and old linen.

Robert Marwell, handsome new invalid's chair.

Miss Rawlins, flowers, fruit, fans and 10 yds. calico.

Mrs. E. B. Denegre, subscribed for "St. Nicholas," for Boys' Ward

Mrs. C. Muller, fruit and reading matter for sick, and toys and clothes for children.

Mrs. E. B. Denegre, 10 boxes, costing \$40, placed in the different public buildings, to receive reading matter for patients.

R. C. Eyrich, reading matter.

Mrs. Gauche, reading matter.

Mrs. Glen, reading matter.

Miss Mortimer, made 12 shirts for sick men.

Miss Rawlins, fruit, flowers, cigars and unbleached cotton.

Mr. I. Lahare, fresh eggs, sundry times.

Mr. Chas. Gitzinger, | bale straw.

Mr. L. Ruch, baskets of fruit, sundry times.

Residence, 183 Esplanade street, large bundle of clothes for children.

Miss M. Rawlins, cakes, fruit and sundries for sick.

A Citizen, reading matter for patients.

Mr. Pritcher, St. Louis, 2 bbls. apples.

Mrs. I. Moran, Fort St. Philip, 1 bbl. oranges and box eggs.

Mrs. Horace Perry, \$5.

Mrs. Gayle Aikin, clothes.

Mrs. E. B. Denegre, carriage ride to children, sundry times.

A. Peperkorn, "patient," 5 galis. honey.

Mrs. B. F. Jonas, box of toys and sundries for children.

Mrs. Dykers, shoes and clothes for children.

Miss M. Rawlins, cigars, fruit and old linen.

The Misses Waldo, "Val. Inst.," box of toys for children.

The Children of Valence Institute, large cake for children.

Mr. Brooks, \$10.

Mrs. E. B. Denegre, clothes, shoes and sundry toys for children

Mr. Bergamini, coop of turkeys.

Mr. O. Cahill, 2 turkeys.

Mrs. A. Siegel, large frosted cake.

Mr. L. Ruch, 4 turkeys and basket fruit.

Mrs. Curtis, two little pigs.

Mrs. E. B. Denegre, turkey, nuts, candy and raisins, "Boys' Ward."

Mrs. Jos. M. Rice, cakes, nuts and sweetmeats for patients.

Miss C. Aiken, clothes and toys for children.

Miss M. Rawlins, cakes and fruit.

Mrs. Charles Lafitte, infant trousseau.

Flower Ladies' Association, weekly distribution of flowers.

Messrs. Smith Bros. & Co., case choice wine.

Five copies "Holy Family," sent weekly through the mail.

Sundry Donations, old linen for charpie.

Mme, Parlongue, remnants of cloth for pants for the little boys.

Mrs. T. S. Kennedy, box of toys and balloons for children.

Mrs. Harry Howard, toys, fruits, etc., for children.

ANNUAL REPORT OF THE HOUSE SURGEON.

CHARITY HOSPITAL,
DECEMBER 31st, 1886.

To the Board of Administrators:

Gentlemen—I have the honor to report on the medical management of the Hospital, and submit the records for 1886.

At the last report, 556 patients remained under treatment; during the year, 5807 new patients were admitted. The total of inmates treated was 6363; white 4738, colored 1625; males 4882, females 1481. Of the admissions, 116 were children under ten years; 97 white, 19 colored.

The admissions were 336 less than the previous year, and 1473 less than in 1884. This farther reduction in the number of admissions indicates the continued good health of this city and the lower Mississippi Valley.

The daily average of inmates was greatest in December, 632; smallest in June, 511. The daily average of inmates, during the year, was 567; 15, the daily average of admissions.

Of the 6363 inmates treated, 4764 were discharged; cured 2724, or 57 per cent.; improved 1512, or 31 per cent.; unimproved 510, or 10 per cent.

There were 960 deaths—a total mortality of 15 per cent. Of the total deaths, 71 occurred on the day of admission; 96 on the following day, showing the critical condition in which many patients are admitted. Deducting these 167 deaths, the mortality is reduced to 12 per cent.

Pulmonary Consumption caused 167 deaths, a little more than one-sixth of the total mortality. True, 25 of the fatal cases

came from other States, expecting benefit by change of climate; but 80 of the number had resided in Louisiana one year and longer; while 60 were natives. These figures show the frequency of the disease in our midst, and its fatality should teach stricter obedience to all sanitary laws, which are in any way protective.

The records of the Out-door Department, herewith submitted, show the treatment of 13,336 cases. The benefits of this department, intended for those only who are needy and worthy, are too frequently sought by people who have means to secure medical attendance elsewhere. In the Out-door Clinics are treated the milder types of disease, and also many patients more seriously ill, who prefer to live at home and come at intervals for consultation and surgical dressing. This plan proves an economy to the Hospital. At present, the out-door patients are treated in the Hospital buildings, and many of them, in the presence of the inmates. However orderly the management, the daily visits of so many patients necessarily disturb the inmates. The necessity of a separate building for the Out-door Department, as urged in my last annual report, becomes more and more apparent. In this connection, an Out-door Dispensary is not contemplated, but a building in which the work of outdoor relief, comprising consultations, prescriptions, minor surgery, surgical dressings, etc., could go on, without disturbing the inmates of the Hospital.

During the year just closed, the medical service has been improved by the establishment of a department for the special treatment of Diseases of the Skin; and also by the erection in the Main Building of a 36-cell electric battery, which adds greatly to the facilities for treating Nervous Diseases.

The number of colored people admitted into medical wards exceeds the accommodations set apart for them. It is necessary to open an additional medical ward for colored men.

The Lying in Department for colored women should in time be extended and improved. An additional room, like the Eye Operating Room, built in the rear of the old Female Department, would enlarge the ward space sufficiently, and much improve the welfare of these patients.

The Main Building has been much improved and the patients made more comfortable by the introduction of steam radiators in each ward; but there yet remains the necessity of freer escapes for the heated air and freer communication, by transoms, between the air of the wards and the halls.

Furthermore, in this connection, I beg to submit that the sanitary condition of the Main Building, erected in 1832, will never be entirely satisfactory, nor the Hospital Sewer System complete, until better water-closets are introduced, as urged in previous reports.

It becomes my duty to report the irregular attendance of the Visiting Staff, which is inconsistent with the welfare of patients, as well as the preservation of system in the medical service. I respectfully recommend that the membership of the staff be limited to a number capable of doing the work and willing to attend their wards regularly. A smaller staff of punctual members would be preferable, and a limited membership would enhance the honor of election. A daily register of the attendance of each member of the staff should be kept, as done in many well-ordered institutions, and submitted with applications for re-election, to guide you in bestowing honors where they have been deserved.

A change should be made in the manner of keeping the clinical records of the Hospital. The Resident Students have been taxed with increased duties since the extension of the buildings, more especially since the inauguration of the Ambulance Service, so that it seems impracticable for them to keep the full notes of all cases, as contemplated in the present system.

So, herewith is submitted a plan, which will materially lessen their labors, and yet preserve records sufficiently complete. By the method proposed, the cardinal points in the history of all cases are tabulated, reserving our present system of full notes only for the record of cases of unusual medical interest.

The statistical value of the Annual Report of the Hospital would be improved by adherence to a more uniform nomenclature of disease. I respectfully suggest that the nomenclature of the Royal College of Physicians, of London, now adopted by the American Medical Association and by some of the best American hospitals, be approved by the Board, and printed copies furnished for the guidance of the Medical Staff.

The completion of the Ambulance House is an important event in the records of the year. The electrical appliances, introduced by the Engineer, Mr. Ponder, are excellent, and the facilities for rapid action now enable the Ambulance Corps to start on a call within one minute from the time of signal. This service is working satisfactorily, and I cannot commend too highly the efficiency and zeal with which the members of the Corps discharge their duty. The ambulances should be reserved for cases of emergency only, to attend the more seriously ill and injured; otherwise the Ambulance Surgeons are unuecessarily called from other important duties. The extent of the usefulness of this department will appear in the Report of the Ambulance Service, herewith presented, in which are recorded 508 cases conveyed to the Hospital, 192 surgical cases dressed on the spot, and 110 carried from the place of accident to their homes.

The summary of the work of the year shows that the Hospital has given relief to 6363 inmates and 13,336 out-door patients, making a total of 19,699, all tabulated in special reports, herewith presented.

In reviewing the work of the year, I take pleasure in com-

mending to you the very competent service rendered by Dr. F. W. Parham, the Assistant Surgeon, and other officers associated with me in charge of their respective departments; and I wish to acknowledge, in most grateful terms, the invaluable aid given in our medical work by the Sisters of Charity, whose constancy in the domestic care of patients contributes so greatly to their comfort and to their chances of recovery.

Finally, speaking for the rest, I beg to express our appreciation of the kindly manner in which you have directed our work, and our sense of the honor attached to service under an administration which has enhanced so much the usefulness of the Institution.

Respectfully submitted,

A. B. MILES,

House Surgeon,

ANNUAL REPORT OF THE PATHOLOGIST.

CHARITY HOSPITAL, STATE OF LOUISIANA, New Orleans, January 1st, 1887.

To the Board of Administrators of the Charity Hospital:

Gentlemen—I beg to report the following work done in	this
department during the year 1886, viz:	
Specimens of Tumors examined	52
Specimens of Vomit examined,	6
Specimens of Sputa examined	72
Specimens of Fluid examined	18
Specimens of Urine examined	339
Miscellaneous specimens examined	35
Sections cut of 84 specimens, in sections	348
Sections permanently mounted for collection	69
Autopsies held	157
Respectfully,	

H. D. SCHMIDT, Pathologist.

REPORT OF THE AMBULANCE SERVICE, 1886.

Recapitulation of Ambulance Calls from January 1st, 1886, to December 31st, 1886.

Annual total	4552	3569	1769	1972	8121	3741	6321	5541	1474	13,336

The above record shows the number of out-door patients reported, 13,336, some of whom, while under treatment, visited the Hospital every day, some on alternate days, others at variable intervals. Some patients are counted several times, as they were treated at different periods during the year. In addition to these, a large number of cases of accidental surgery were treated in the Amphitheatre of the Hospital; these have not been separately counted, since most of them were subsequently treated in the surgical out-clinics of the various wards.
